Your reliable partner for intelligent hedging solutions

Precious metals are especially useful in industrial applications due to the fact that they do not or hardly at all oxidise. Their significance as an important medium of exchange and store of value is due mainly to other factors though: their scarcity, ease of transport and storage, their divisibility and virtually unrestricted reusability. That is why precious metals, and gold in particular, are often seen as a “safe haven” in times of crisis. Nevertheless, they are and remain liable to price fluctuations in response to geopolitical and global economic developments.

Commerzbank offers years of market experience, sound expert knowledge and expertise across the entire spectrum of physical and non-physical precious metals.

In addition to a comprehensive range of precious metals financial and physical hedging options, we offer financing products that includes precious metals leasing plus a complete range of physical services such as vaulting, unallocated and allocated accounts, transportation and quality swaps as well as refining and upgrading.
